 i) Commercial Banks (excluding RRBs, LABs, and PBs) shall disclose information on their Liquidity Coverage Ratio (LCR) covering all the four quarters of relevant financial year in the format given below:

S.B.BAGRI & CO

Sercentage of shareholding of State Government and Sponsor Bank is applicable only for RRBs.

Osavings Bank and Current Deposits may be classified into volatile and core portions. Savings Bank (10 per cent) and Current (15 per cent) Deposits are generally withdrawable on demand. This portion may be treated as volatile. While volatile portion can be placed in the Day 1, 2-7 days and 8-14 days time buckets, depending upon the experience and estimates of banks and the core portion may be placed in over 1-3 years bucket. This classification of Savings Bank and Current Deposits is only a benchmark. Banks which are better equipped to estimate the behavioural pattern, roll-in and roll-out, embedded options, etc. on the basis of past data / empirical studies could classify them in the appropriate buckets, i.e. behavioural maturity instead of contractual maturity, subject to the approval of the Board / ALCO

S.B.BAGRI & Co.,

Un-weighted values shall be calculated as outstanding balances maturing or callable within 30 days (for inflows and outflows) except where otherwise mentioned in the circular and LCR template.

- Weighted values shall be calculated after the application of respective haircuts (for HQLA) or inflow and outflow rates (for inflows and outflows)
- Adjusted values shall be calculated after the application of both (i) haircuts and inflow and outflow rates and (ii) any applicable caps (i.e. cap on Level 2B and Level 2 assets for HQLA and cap on inflows).

Data must be presented as simple averages of daily observations over the previous quarter (i.e. the average is calculated over a period of 90 days). Banks must publish the number of data points used in calculating the average figures in template. The simple average shall be calculated on daily observations over the previous quarters. For most data items, both un-weighted and weighted values of the LCR components shall be disclosed as given in the disclosure format. The un-weighted value of inflows and outflows shall be calculated as the outstanding balances of various categories or types of liabilities, off balance sheet items or contractual receivables. The weighted value of HQLA shall be calculated as the value after haircuts are applied. The weighted value for inflows and outflows shall be calculated as the value after the inflow and outflow rates are applied. Total HQLA and total net cash outflows shall be disclosed as the adjusted value, where the adjusted value of HQLA is the value of total HQLA after the application of both haircuts and any applicable caps on Level 2B and Level 2 assets as indicated in this Framework. The adjusted value of net cash outflows is to be calculated after the cap on inflows is applied, if applicable.

 Banks shall provide sufficient qualitative discussion¹⁰ around the LCR to facilitate understanding of the results and data provided.

other inflows and outflows in the LCR calculation that are not captured in the LCR common templatebut which the institution considers to be relevant for its liquidity profile.

¹⁰ For example, where significant to the LCR, banks could discuss:

a) the main drivers of their LCR results and the evolution of the contribution of inputs to the LCR's calculation over time;

b) intra period changes as well as changes over time;

c) the composition of HQLA:

d) concentration of funding sources;

e) derivative exposures and potential collateral calls;

f) currency mismatch in the LCR;

g) a description of the degree of centralization of liquidity management and interaction between the group's units; and

c) Net Stable Funding ratio (NSFR)11

(Not Applicable to RRBs, LABs, PBs and UCBs)

- After the guidelines on NSFR become effective, Commercial Banks (excluding RRBs, LABs, and PBs) shall be required to publish their NSFRs as per template given below.
- ii) Banks shall publish this disclosure along with the publication of their financial statements/ results (i.e. typically quarterly or semi-annually), irrespective of whether the financial statements/ results are audited. The NSFR information shall be calculated on a consolidated basis and presented in Indian Rupee.
- iii) Banks shall either include these NSFR disclosures in their published financial reports or, at a minimum, provide a direct and prominent link to the complete disclosure on their websites or in publicly available regulatory reports.
- iv) Data shall be presented as quarter-end observations. For banks reporting on a semi-annual basis, the NSFR shall be reported for each of the two preceding quarters. For banks reporting on an annual basis, the NSFR shall be reported for the preceding four quarters. Both unweighted and weighted values of the NSFR components shall be disclosed unless otherwise indicated. Weighted values are calculated as the values after Available Stable Funding (ASF) or Required Stable Funding (RSF) factors are applied. Banks shall, in addition to the template prescribed below, provide a sufficient qualitative discussion around the NSFR to facilitate an understanding of the results and the accompanying data.

¹² For example, where significant to the NSFR, banks could discuss the drivers of their NSFR results and the reasons for intra-period changes as well as the changes over time (e.g. changes in strategies, fundingstructure, circumstances etc.).
